New Page of Data

Data Entry

Enter as indicated in volume 1

Install SScens exactly as instructed.

Before entering data:

1. Do not attempt to adjust column widths manually.
2. Select all and set the character format to a Fixed Pitch Font, say 10 point Courier or Courier New.
WHY?

Most modern fonts are proportional i.e., the "i" takes up less space than an "m" See the next lines in Arial.

This makes them look good in print

iiiiiiii = 10 x "i"

mmmmmmmmmm = 10 x "m"

The same lines in Courier New (they are now the same length)

iiiiiiiiiii = 10 x "i"

mmmmmmmmmm = 10 x "m"

This means that the alphabets printed in row three automatically set the column width and count the characters for you.

If the cell overflows it is too full

You must abbreviate your entry

grant	Ellen	Dau	U	F	23
grant	Matilda	Dau	U	F	21
grant	Clara	Dau	-	F	12

" Do's and Ditto's"

IMPORTANT "Ditto" and "Do" are not permitted.

Enter data in full.

The reason is that the final data base sees each line of of the table as a single record which must be complete within itself

Vol.2 - SScens and typical private house entry (Cols I to Y)

43	Parker	Mary a		Sistr	M	F	38					Wil	Devizes				

The Spreadsheet Format

1. To work with SScens, you will need a spreadsheet programme.
2. For those who have an older machine, or do not have **Microsoft Office** or a similar (expensive) programme, perhaps you only use your machine for simple word processing, a useful and compatible 'Freebie' is:
Openoffice.Org.1.1.4 available for free download at <http://www.openoffice.org/>
This is the programme I use for data entry
3. A version of this programme is also available for Linux users.
